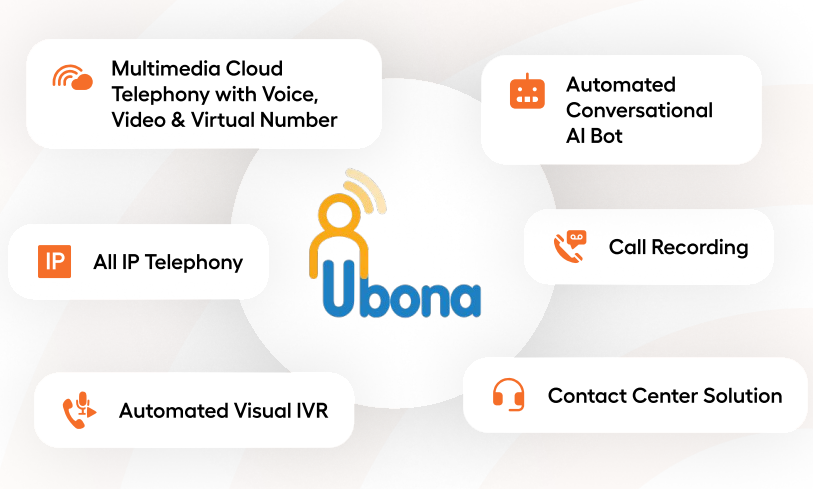
What is Ubona?

- Ubona is an Indian technology company that focuses primarily on **Speech Recognition** and **voice-based** solutions.
- Ubona's core technology includes **Voice recognition**, **Natural Language Processing** (**NLP**), and **Voice-based IVR** (**Interactive Voice Response**) **systems.**
- Ubona's solutions aim to enhance **Customer Engagement** by making technology **more accessible** through **voice commands.**
- It **Develops Platforms & Applications** that enable users to **Interact With Devices**, services, or applications **Using Natural Language.**



Multimedia Cloud Telephony with Voice, Video & Virtual Number
Automated Conversational AI Bot
All IP Telephony
Ubona
Call Recording
Automated Visual IVR
Contact Center Solution

What brought them to us?

- Ubona approached us as they were diversifying their business by providing **IVR services to banks & brokerage firms**, including for **IIFL Securities**
- They aimed to introduce an **IVR-based** mobile experience for **IIFL Securities** and sought our expertise to design a seamless mobile product for **Demat** and **Trading** onboarding, ensuring an intuitive user journey integrated with their **voice-driven technology**

What is a Demat & Trading Account?

- Demat means **Dematerialzed account** which holds **financial Securities in an electronic form**
- Trading account is used to **execute, buy and sell orders**. Buying credits shares to your linked Demat account & Conversely debits shares when you sell them.

DEMAT

How a Demat Account is created?

- Choose a Depository Participant
- Fill out the form & provide required documents
- KYC Complaince
- Sign the Agreement
- Receive Demat Account Number

Who all are involved in this?

Investor
An investor allocates capital into various assets to generate returns and grow wealth over time

Depository Participant
It is an intermediary that helps investors open and manage demat accounts for holding and trading securities electronically

Depository - NSDL/CSDL
A central organization that holds securities in electronic form. The DP is connected to a depository to hold the securities

SEBI (Securities and Exchange Board of India)
SEBI regulates DPs and brokerage firms to safeguard investors' interests and ensure compliance with financial laws.

KYC Agencies
KYC agencies verify an applicant's identity and address during Demat account creation to ensure compliance and prevent fraud.

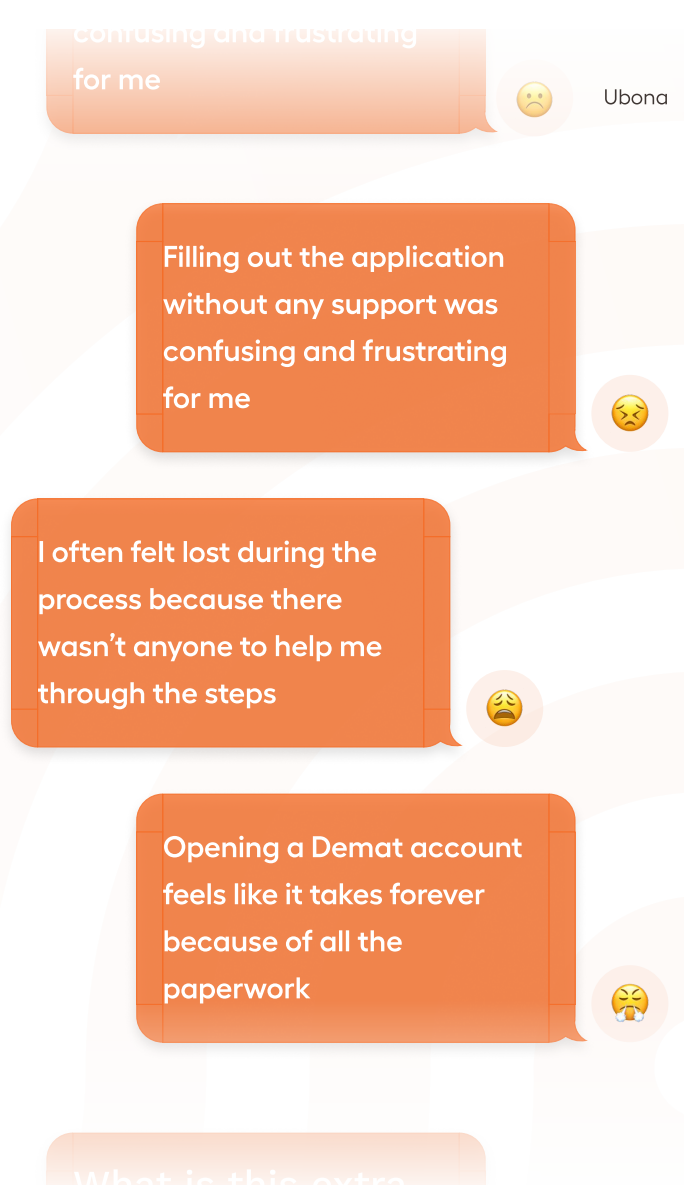
Banks
If you need to fund your trading account, a payment bank may facilitate the transfer of money to your trading account.

Why are we doing this?

With more than **1L+ users** creating a **Demat Account** per day, enhancing this experience for the users was crucial.

We identified a few problems with the traditional account creation flow:

- Traditional Demat account opening involves **lengthy paperwork**, **in-person verification**, making it time-consuming and prone to errors.
- Many users struggle with the absence of **real-time assistance**, leading to frustration, incomplete applications or delays



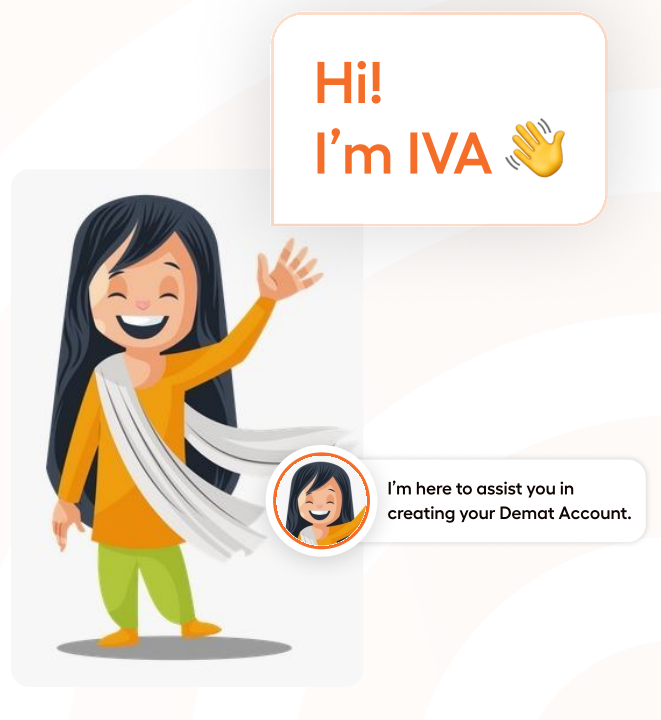
Filling out the application without any support was confusing and frustrating for me 😣

I often felt lost during the process because there wasn't anyone to help me through the steps 😩

Opening a Demat account feels like it takes forever because of all the paperwork 😤

How are we solving this problem?

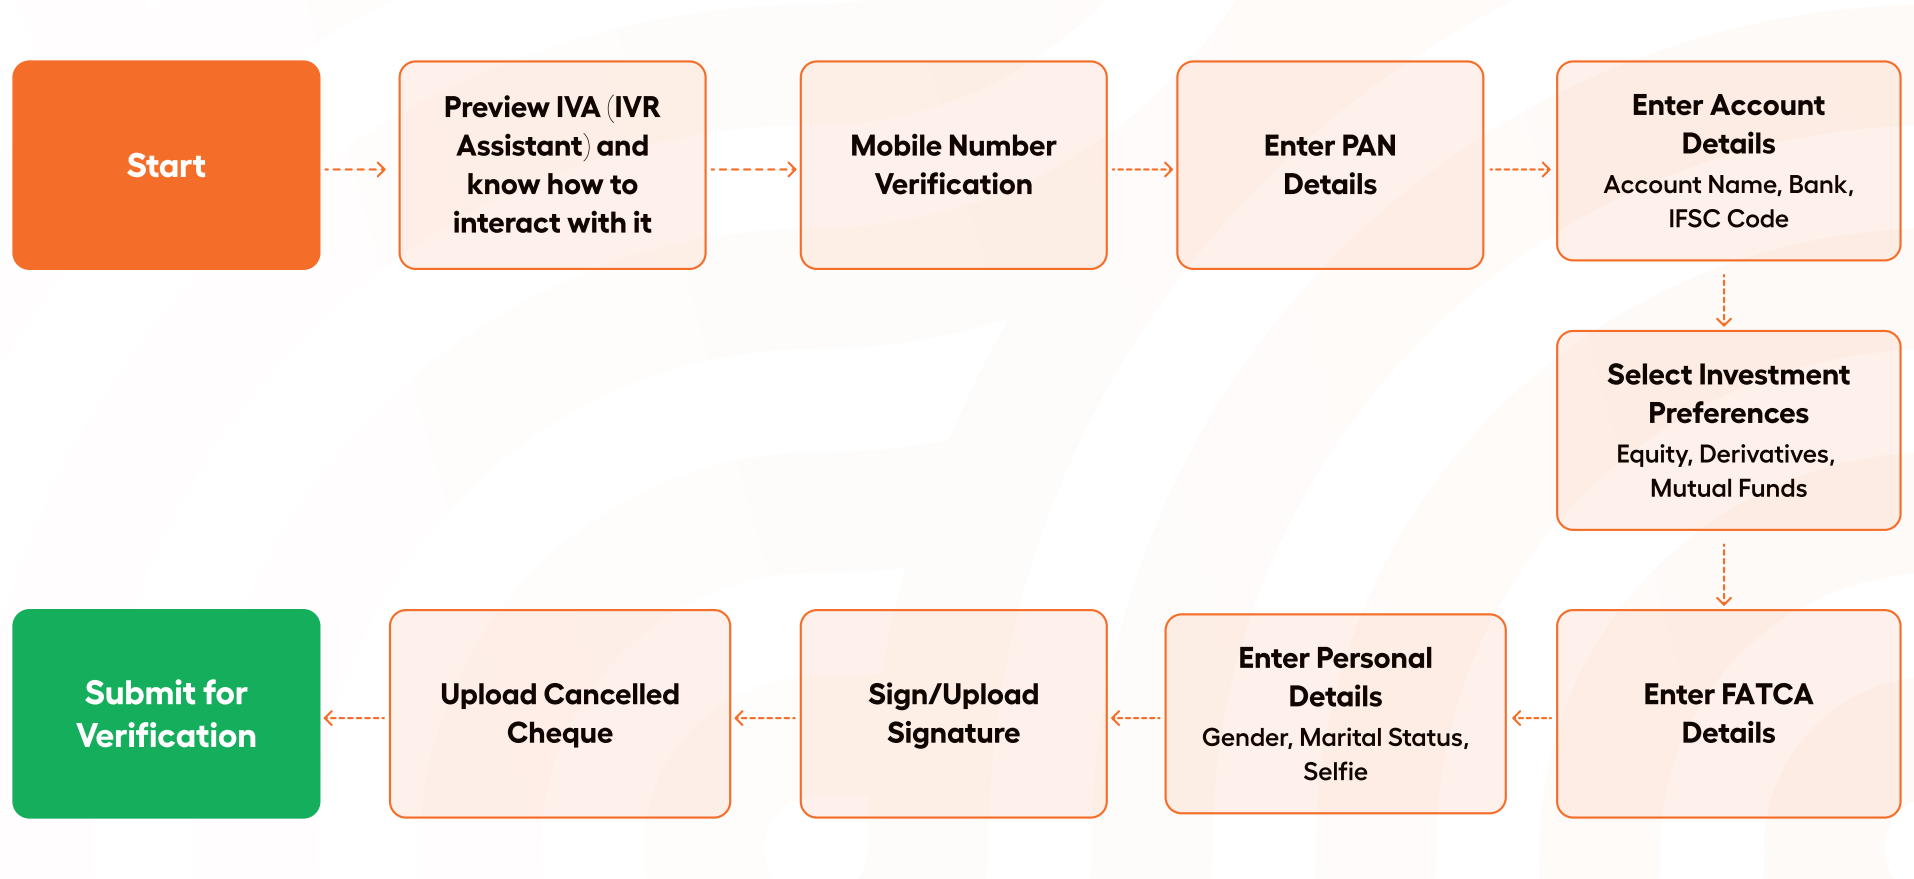
- **By leveraging Visual IVR technology:**
  Visual IVR (Interactive Voice Response) is a technology that helps customers interact with a company's services using both **voice** and a **visual interface** on their smartphones or computers.



How does Visual IVR work?

1. **User calls the Customer care**
   Customer care agent sends them a link via SMS through which users can perform the task with the help of Smart or Visual IVR
2. **User initiates the Demat Account Creation**
3. **User is welcomed by the IVR Assistant**
   that provides both audio and visual instructions to facilitate the account creation process
4. **User completes KYC Details with Guidance**
5. **User submits the Account Application**
   IIFL will further futher verify the details for apprval

Task Flow - Creating a Demat Account



Start → Preview IVA (IVR Assistant) and know how to interact with it → Mobile Number Verification → Enter PAN Details → Enter Account Details (Account Name, Bank, IFSC Code) → Select Investment Preferences (Equity, Derivatives, Mutual Funds) → Enter FATCA Details → Enter Personal Details (Gender, Marital Status, Selfie) → Sign/Upload Signature → Upload Cancelled Cheque → Submit for Verification

Business Impact

1. **Improved User Experience**
   IVR assistance broadened **accessibility**, kept users **engaged** in the process
2. **Reduced Errors & Support Queries**
   Step-by-step guidance **minimized mistakes, lowering support requests.**
3. **Increased User Conversion**
   Visual IVR guided onboarding **reduced drop-offs, faster account openings** and thus **resulting in high user conversions.**

Learnings

This project helped me develop my design process and learned that every project presents its own unique challenges. **I came to understand that product design is a collaborative process that involves a cycle of feedback** and **iteration to refine and improve the design**

- This project helped me learn how leveraging **Smart IVR** can significantly streamline the Demat Account creation process by offering users **continuous assistance** and **clear instructions**, ensuring ensuring a seamless and intuitive experience
- Learned to **effectively communicate** the broader vision to project managers, emphasizing the importance of a **user-focused approach**
- Acknowledged the value of iteration in exploring diverse possibilities, leading to **improved user experiences**.

THANK YOU
